Kakinada, 533001

OBJECTIVE

Motivated Information Technology student with a strong interest in **Artificial Intelligence and Software Development**. Seeking opportunities to apply programming and problem-solving skills through internships and real-world projects while contributing to innovative technology solutions.

TECHNICAL SKILLS

- **Programming Languages:** C, Python, Java(basics), MySQL
- **Web Technologies:** HTML, CSS, JavaScript
- **Concepts:** Data Structures, Machine Learning Basics
- **Tools:** Git, VS Code, Canva
- **Soft Skills:** Adaptability, Communication, Teamwork, Problem Solving

PROJECTS

DermaMind – AI Skin Cancer Detection System

- Developed a **machine learning-based web application** for early skin cancer detection.
- Implemented image analysis to identify possible skin abnormalities.
- Added a feature to **locate nearby dermatology hospitals** for medical consultation.
- Led a team during a hackathon to design and build a functional healthcare system prototype.
- Focused on improving accessibility to early healthcare diagnosis.

Technologies: Python, Machine Learning, HTML, CSS, JavaScript

RetailShield – Smart Retail Theft Detection System

- **Designed and developed an AI-powered retail surveillance system for detecting theft and suspicious activities.**
- **Leveraged computer vision and machine learning models to analyze live video streams from security cameras.**
- **Automated theft detection by identifying unusual customer behavior and generating real-time alerts.**
- **Developed a responsive web dashboard for incident tracking, monitoring, and reporting.**
- **Improved retail security by enabling proactive loss prevention and faster response to theft attempts.**

Technologies: Python, OpenCV, Machine Learning, Computer Vision, HTML, CSS, JavaScript

CureBot – AI Healthcare Chatbot

- Developed an AI-powered chatbot to provide preliminary medical guidance based on user symptoms.
- Implemented Natural Language Processing (NLP) to understand healthrelated queries and generate responses.
- Collaborated with a team during a hackathon to design and build a functional healthcare assistance prototype.
- Focused on improving accessibility to basic medical information through conversational AI.

Technologies: Python, Machine Learning, NLP, HTML, CSS, JavaScript

HACKATHONS

- **MIND SPRINT 2K25 – 36-hour National Level Hackathon PSCMR College**
- **Vizag Tri-Mobility Challenge 2026 – 24-hour National Level Hackathon NSRIT College**

EDUCATION

- Bachelors of Technology(B.Tech) | Pragati Engineering College pursuing 3rd year, Information Technology (IT)
- XII | Narayana Junior College | MPC | Score: 91% Kakinada | March - 2024
- X | St. Joseph's Convent School | ICSE | Score: 77% Jagannaickpur, Kakinada | April - 2022

CERTIFICATIONS

- **AICTE UiPath RPA Developer Virtual Internship**
- **Google AI-ML Virtual Internship**
- **Cybersecurity Virtual Internship**
- **Quantum Fundamentals Program** – Qubitech & WISER, a 4-week certification on basics of Quantum Computing. (Feb 2026)
- **Deloitte Data Analytics Job Simulation – Forage** (June 2026)

EXTRA CURRICULAR ACTIVITIES

- Actively participating in **national level hackathons and technical events**
- Exploring **AI-based healthcare and computer vision projects**

- KAVYA SANKURU
